Authentication

Strengthen Your Identity Strategy With These Benefits

Protect Access to Lattice and All Apps

Lattice a variety of data across your organization. Secure access and accelerate user adoption by allowing employees to use their master credentials to log into Lattice and all their corporate SaaS applications.

Eliminate Deployment Complexity

Leverage OneLogin's pre-built Lattice integration and powerful mappings and rules engine to automate the Lattice deployment process. Spend less time on manual entry and more time on other IT initiatives.

Decrease IT Operations and Support Costs

Free up IT time and resources with built-in self-service password reset and automated user provisioning and deprovisioning based on user's directory attributes or security groups originating from your corporate directory.

Customize Security Controls

Create and enforce customized security policies such as multi-factor authentication, password complexity, session timeout, and more. Easily map those policies based on user attributes or other identifiers such as IP address.

Advanced Security and Scalability

Rest easy with redundant data centers in the US and Europe, massive scalable infrastructure, quarterly security reviews by iSEC partners, and 24/7 monitoring. 99.9% Uptime Guarantee.

Over 2,000 enterprise customers globally secure their applications with OneLogin

Integrates with Your Existing Directory Infrastructure

OneLogin acts as a secure, virtual directory in the cloud, allowing you to easily synchronize users across any number of directories, including Active Directory (AD), LDAP, Google Apps directory, OneLogin cloud directory, and HR directories. Import user attributes and pass them on to Lattice and other downstream applications via SAML or API-based provisioning.
