Streamlining User Management Workflows Between IT and HR

Implement an HR-driven identity strategy to simplify employee on- and off-boarding workflows jointly managed by HR and IT. Put an end to time-consuming, manual entry of user data between Namely and IT-driven user directories, like Active Directory (AD).

With OneLogin and Namely you can have one primary system of record for user data across all your applications. If AD, LDAP, or Google Directory must remain your primary system of record, leverage OneLogin's best-in-class directory connectors to delegate authentication and grant, modify, or revoke user access to Namely and other applications based on their directory attributes.

OneLogin for Namely Product Highlights

HR-Driven Identity	Directory Integration	Single Sign-On (SSO)	Multi-Factor Authentication	Self-Service Password Reset

Strengthen Your Identity Strategy With These Benefits

Protect Access to Namely and All Apps

Namely hosts some of your organization's most sensitive data - employee data. Secure access and improve user adoption by allowing employees to use their master credentials to log into Namely and all their corporate SaaS applications.

Decrease IT Operations and Support Costs

Free up IT time and resources with built-in self service password reset and automated user provisioning and deprovisioning. Spend time and money focused other IT initiatives.

Customize Security Controls

Create and enforce customized security policies such as multi-factor authentication, password complexity, session timeout, and more. Easily map those policies based on user attributes or other identifiers such as IP address.

Reduce Complexity of Integration Projects

Leverage OneLogin's pre-built integrations with Namely and all your applications instead of resorting to lengthy integration rollout projects.

Over 2,000 enterprise customers globally secure their applications with OneLogin
