- Vonage Business Cloud Application Only
- Single Sign-On via SAML (SSO)
- Directory Integration with AD or LDAP
- User Provisioning & Deprovisioning
 - Username
 - First Name
 - Last Name
- Multi-Factor Authentication (MFA)
- Self-Service Password Reset for End Users
- User Login and Access Reporting

ONELOGIN SOLUTION BENEFITS

Simplify Access Management

Gain crucial visibility into and centralize IT control over all users and cloud apps.

Reduce Internal Threat Risk

Enforce IT security policies such as MFA, password length and complexity, and more. Configure unique, role-based access policies for applications.

Streamline User On/Off-Boarding Processes

OneLogin acts as a secure, virtual directory in the cloud, allowing you to easily synchronize users from Active Directory (AD), LDAP, or Google apps to Vonage Business Cloud via SCIM for automated provisioning and deprovisioning.

Decrease Help Desk and IT Operations Costs

Lower demand on IT resources for (de)provisioning users during deployment and offboarding, building and maintaining integrations, password reset, and more.

Strengthen Overall Compliance

Leverage the OneLogin audit trail as single source for SOX reporting and maintain data residency requirements.

Accelerate ROI from Your Cloud Investment

Drive user adoption of new cloud/SaaS technologies. Accelerate new app deployment and reduce associated costs.

Consolidate Directory Services

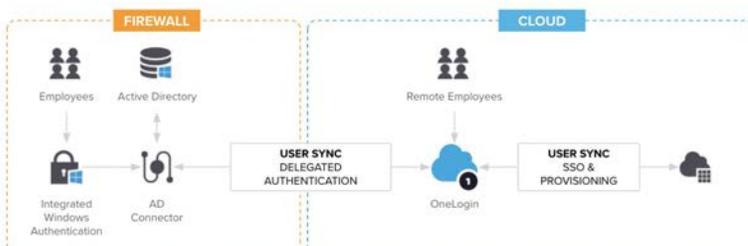

Unify multiple directories, re-structure and standardize data formats, and quickly deploy federation services.

OneLogin Trusted Experience Platform

Your foundation to build secure, scalable and smart trusted experiences

Today, the proliferation of digital access has made the world more connected than ever before. With the availability of technology, endless devices, and global access points, you users—employees, customers, and partners—have the flexibility to interface with technology at their convenience. As a result, businesses are constantly faced with the growing complexity of maintaining a secure environment while ensuring a seamless end-user experience.

The OneLogin Trusted Experience Platform

The OneLogin Trusted Experience Platform™ is the identity foundation to build secure, scalable, and smart trusted experiences that connect people with technology. Leverage OneLogin to seamlessly manage all your digital identities for your workforce and customers, so you can focus on what matters most—growing your business.

Key Benefits of the OneLogin Trusted Experience Platform

Streamline access management operations

Centralize identity and access management across all your users, directories, and applications, whether on-premises or in the cloud. Accelerate application rollout, automate employee onboarding and offboarding, and reduce access-related help desk requests with self-service password reset.

Achieve a single source of truth

Synchronize the OneLogin Cloud Directory with multiple directories, such as G Suite, Active Directory and LDAP, in real-time for instantaneous onboarding and de-provisioning. Eliminate the need to maintain and update Active Directory.

Strengthen and enforce security and compliance

Protect users and data from cyberattacks by leveraging intelligent authentication and access policies that balance security with usability.

Increase efficiency gains and productivity

Onboard new users in minutes and modify permissions in real-time for rapid application access. Enable users to access all on-prem and cloud applications from a single, secure portal on any device and at any location. Drive productivity gains from day one with faster access to applications.

Dramatically reduce access management costs

Eliminate dependencies on costly, inefficient, and complex legacy access management systems. Consolidating user profile data in the cloud helps you save directory infrastructure and maintenance costs.

Gain greater visibility, control, and management

Centralized identity and access management provides a single audit trail of all login activity and allows you to easily run the reports you need to remain compliant.

Over 5,500 Customers Globally Access the World with OneLogin
