OneLogin Multi-Tenant Capabilities

Secure and protect you and your tenants with one simple administrator interface

Managing identity can be challenging and complex, especially when an organization is responsible for managing the identities of subsidiaries, customers, partners, vendors or sub-brands - also known as "tenants." In today's digital landscape, organizations need an identity and access management platform that can support the management of multiple organizations or tenants remotely through a "single pane of glass." Multi-tenancy enables tenants to operate autonomously from each other, with different configurations, policies and users, while still sharing the same applications and OneLogin instance. This enables organizations to maintain one infrastructure, while still keeping their tenant's data and business logic separate and secure.

"...since we started working with OneLogin, our IT team's time spent on service desk tasks has dropped significantly. We are now able to offer self-service facilities across multiple sites, which has greatly improved corporate efficiencies.

JEREMY HYLAND | IT Director, Consort Medical

Benefits

- **Trusted Identity Provider** – Configure multiple identity providers to securely sign users in to OneLogin and downstream applications using their own corporate or social credentials

- **Lower Costs of Maintaining Multiple Servers & Infrastructures** – Reduce the costs of provisioning and managing software and infrastructure across the multi-tenant environment

- **API Integration Scalability** – Utilize OneLogin's APIs to easily scale and consolidate user and application management across all tenants

- **Enable Tenants To Manage Their Own Environments** – Enable partners, vendors or subsidiaries to manage their own environments, while the parent maintains the top-level tenant

- **Customized Branding & Subdomain** – Enable tenants to use their own branding and subdomain within their own tenant to maintain consistency across the brand, simplifying the user experience

- **Instant On-Boarding** – Easily provision new partners, vendors or subsidiaries in the cloud, without the need for software or server installation
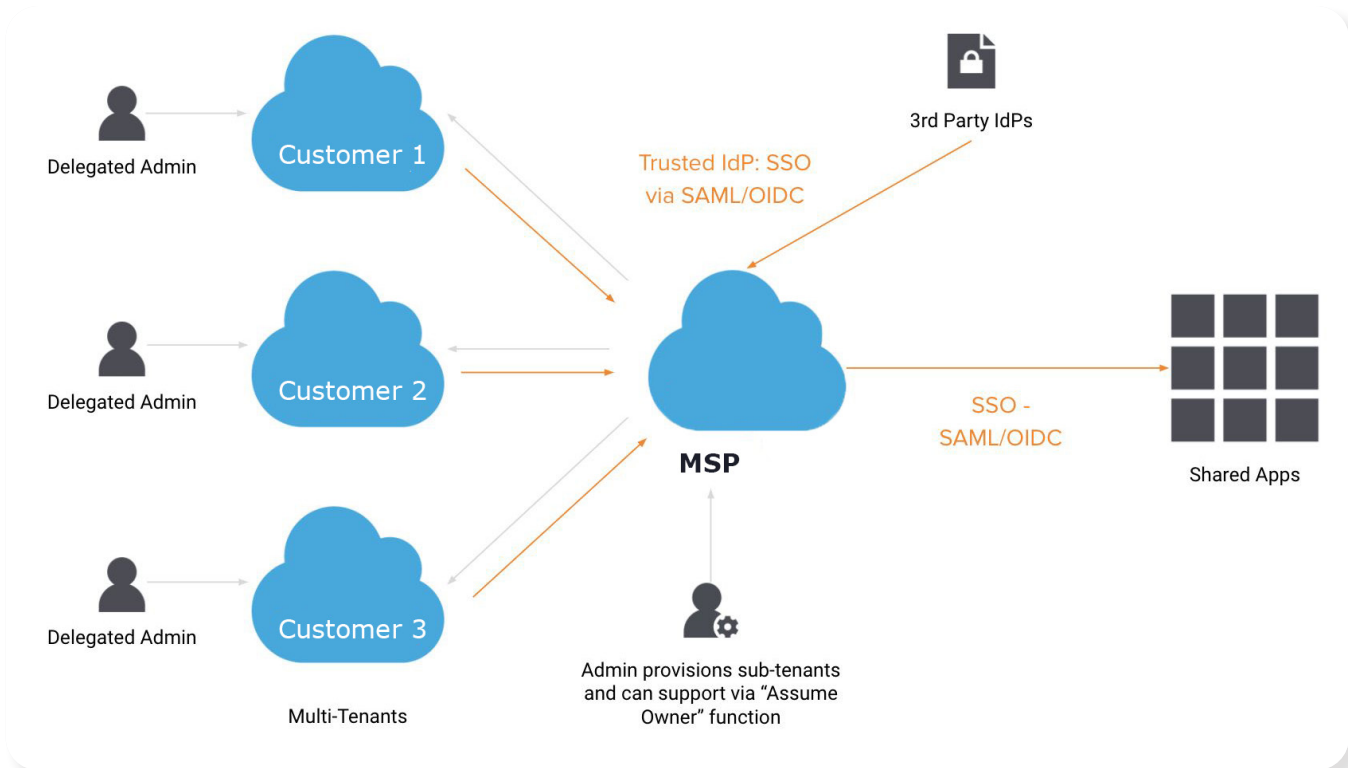

How Our Multi-Tenant Capabilities Empower Our MSPs

Multi-Tenant Capability Features

Custom Branding
Give each tenant the ability to customize their OneLogin tenant to reflect the visual personality of their organization and simplify the user experience with custom logo, color scheme, login label, background image and help instructions.

Custom Sub-Domains
Enable each tenant with the ability to customize their own subdomain to maintain their name brand and serve their specific group of users.

Assume Users
Organizations can set up the ability to assume user privileges to "take control" of users on their tenants to diagnose improper configurations and troubleshoot issues.

Delegated Admin
Utilize this feature to grant granular administrative privileges to users and follow the principle of least privilege, ensuring users only have access to the admin functionality necessary for their job function.

About One Identity

One Identity delivers unified identity security solutions that help customers strengthen their overall cybersecurity posture and protect the people, applications and data essential to business. Our Unified Identity Security Platform brings together best-in-class Identity Governance and Administration (IGA), Access Management (AM), Privileged Access Management (PAM) and Active Directory Management (AD Mgmt) capabilities to enable organizations to shift from a fragmented to a holistic approach to identity security. One Identity is trusted and proven on a global scale – managing more than 500 million identities for more than 11,000 organizations worldwide. For more information, visit www.oneidentity.com.
